# On the Subject of Hand Turkeys

No wonder the soup was so expensive this year, it had 24 carrots.

- This module contains a hand turkey with four colored feathers on each finger.
- Use the color and finger position of each feather to obtain a synonym for that color. If any other solvable module on the bomb has an odd number of letters in common with this synonym, this feather represents a 1, otherwise, it represents a 0.
- Look up the resulting binary number in the second table to find out what to be grateful for, and write this word on the turkey. Use the arrow button to cycle through the alphabet on the letter button (long press to go backwards), and press the letter button to write the currently displayed letter on the turkey. The module will solve once the full word is written, and strike as soon as any incorrect letter is written.

	Pinky	Ring	Middle	Index
Red	Crimson	Sanguine	Carmine	Scarlet
Green	Lime	Forest	Verdant	Olive
Cyan	Turquoise	Teal	Aquamarine	Azure
Magenta	Purple	Violet	Lavender	Mauve
